

Ohio Life Sciences and American Nitrile Announce **Made-in-Ohio** Research Glove Collaboration

Ohio Life Sciences and American Nitrile launch a new collaboration that endorses American Nitrile as the preferred research glove for Ohio Life Sciences member organizations.

American Nitrile is also doing its part to help the environment with a state-of-the-art onsite wastewater treatment and recycling plant capable of recycling 150 million gallons of water annually and practices green manufacturing. It is also building resiliency in the US supply chain.

American Nitrile Advantages

Every American Nitrile glove is proudly manufactured at a state-of-the-art facility in Grove City, Ohio. As the preferred domestic source for nitrile gloves, we ensure:

- ✓ **Delivery:** Stress-free and just-in-time, eliminating unpredictable trans-pacific shipping, port delays, and the need to carry high safety stock.
- ✓ **Corporate social responsibility:** Sustainability in energy and raw material usage plus visibility into ethical labor practices.
- ✓ **Product quality:** American Nitrile gloves are 100% made in the USA to ensure safety and quality are never compromised.

We look forward to a Successful Partnership.
