LOCAL FLEXIBILITY WITH GLOBAL CAPABILITIES

IMPLEMENTATION

We take the guess work out of transitioning from your current supplier to us. Coordinating to prevent supply issues, removal of existing inventory, & training team members to work with us.

SIMPLICITY

We offer one simple solution. One bill monthly, one price, one phone number, one team monitoring your on-hand inventory to make sure your business is running smoothly.

SUPPLY CHAIN

We partner with local distributors that fit the needs of your business. With a network of over 800 approved national partners we've got you covered. We buy industrial gases straight from the source & can supply local partners should the need arise.

SAFETY & COMPLIANCE

We monitor & adhere to your specific safety requirements. With local boots on the ground we standardize the process to verify your product is safely maintained, monitored, & operating properly.

VMG

GAS LEVEL CERTAINTY

Readings Always Accessible. Tanks Never Empty.

Ohio Life Sciences
Advantage

VMG is a Proven Low-Cost Monitoring System

VMG Sensors use Long Range Radio Frequency (LoRa) to transmit readings up-to 1 mile to the Collector. The Collectors can aggregate hundreds of signals, saving on hardware costs, and send them through a secure Private Verizon Network to the Cloud. VMG's systems can monitor:

- ▶ High Pressure Cylinders
- ▶ Bulk, Microbulk, and Beverage Tanks
- ▶ Line Pressures, Flows, and Bulk- Head Pressures
- ▶ Cylinders by Weight
- ▶ Gas Alarms
- ▶ Refrigeration and Temperature
- ▶ Flammable Gases

The VMG Dashboard Provides Real Time Insights

Once in the Cloud, the data is stored and available in an easy to setup and navigate dashboard that helps you quickly identify any issues or potential issues and eliminates any worry about running out. There are customizable warnings and alerts for:

- ▶ Storage and Line Pressures
- ▶ Weight
- ▶ Flow
- ▶ Days Left to Run Out
- ▶ High Use or Other Large Changes

When the Dashboard detects an alert level, it automatically sends out a message in as little as 5 minutes!
